

## INDEX

- Adenoma, bronchial, 139.  
Anaemia, aplastic, 203.  
—, pseudo-aplastic, 190.  
—, refractory. Clinical and pathological aspects, 175; histology of bone marrow in, 179; with partly mature cellular marrow, or pseudo-aplastic anaemia, 190; with hypercellular marrow, or aplastic anaemia, 203; with immature cellular marrow or chronic granulocytopenia, 208; with fibrosis, sclerosis, and giant cell hyperplasia of the marrow, or myelosclerosis, 218; remissions in, 222. Aetiology and treatment, 235: macrocytosis in, 260; liver function in, 260; pigment metabolism in, 262; haemolysin in, 267; resistance of red cells of patients to saponin lysis, 268; protective power of plasma against saponin lysis in, 268; disturbances in excretion of glucuronates and sulphates in, 268.  
Anaemias presenting abnormality in blood pigments, classification of, 101.  
Aneurin (vitamin B<sub>1</sub>) in urine, clinical value of the thiochrome test for, 31.  
  
Bright's disease, chronic, vicious circle in: experimental evidence from the hypertensive rat, 65; nature of histological lesions in rats with long-standing hypertension, 69; effect of excision of the clamped kidney on the hypertension, 76; relation of the residual hypertension to the lesions in the unclamped kidney, 80; can the residual hypertension produce further renal damage, 81.  
Bronchial adenoma, 139.  
  
Clinical value of the thiochrome test for aneurin (vitamin B<sub>1</sub>) in urine, 31.  
Critical review: the mechanism of haemostasis, 1; conditions for haemostasis, 2; haemostatic factors, 3; a hypothesis of haemostasis, 14; hemorrhagic states, 15.  
Crystalbumin, synthesis of methaemalbumin (pseudo-methaemoglobin) from haematin (ferric) and, 119.  
  
Encephalopathy, Wernicke's: clinical features and their probable relationship to vitamin B deficiency, 41; recovery from, 46.  
Erythema, and meningeal symptoms, epidemic myositis with neuritis, 283.  
  
Fibrosis, sclerosis, and giant cell hyperplasia of the marrow, refractory anaemia with, 218.  
  
Glucuronates, disturbances in excretion of, in refractory anaemia, 268.  
Granulocytopenia, chronic, 208.  
  
Haematin: experiments with H. and plasma, 116; H. and the albumin fraction of sera, 118; synthesis of methaemalbumin (pseudo-methaemoglobin) from H. (ferric) and crystalbumin, 119; effect of changes of pH on spectrum of various haematin mixtures, 123; ultracentrifugal investigation of different haematin-albumin mixtures, 126; production of methaemalbumin (pseudo-methaemoglobin) in man and monkeys by intravenous injections of alkaline H. (ferric), 129.  
Haemolysin in refractory anaemia, 267.  
Haemorrhagic states, 15.  
Haemostasis, mechanism of, 1; conditions for, 2; a hypothesis of, 14.  
Haemostatic factors, 3.  
  
Liver function in refractory anaemia, 260.  
  
Macrocytosis in refractory anaemia, 260.  
Marrow, bone, histology of, in refractory anaemia, 179.  
—, cellular, immature, refractory anaemia with, 208.  
—, —, partly mature, refractory anaemia with, 190.  
—, giant cell hyperplasia of, refractory anaemia with fibrosis, sclerosis, and, 218.  
—, hypercellular, refractory anaemia with, 203.  
Meningeal symptoms, epidemic myositis with neuritis, erythema, and, 283.

- Methaemalbumin: clinical aspects, 95; spectroscopic appearance of M. in plasma, 96; differentiation of M. from methaemoglobin and sulphohaemoglobin, 97; other chemical and physical reactions of, 98; Schumm's haemochromogen test, 100; classification of anaemias presenting abnormality in blood pigments, 101; synthesis, chemical behaviour, and experimental production in man and monkeys, 115; experiments with alkaline haematin and plasma, 116; haematin and the albumin fraction of sera, 118; synthesis of M. (pseudo-methaemoglobin) from haematin (ferric) and crystalalbumin, 119; effect of absolute alcohol, acid, and alkalis on, 123; effect of changes of pH on spectrum of various haematin mixtures, 123; ultracentrifugal investigation of different haematin-albumin mixtures, 126; production of M. (pseudo-methaemoglobin) in man and monkeys by intravenous injections of alkaline haematin (ferric), 129.
- Myelosclerosis, 218.
- Myositis, epidemic, with neuritis, erythema, and meningeal symptoms, 283.
- Neuritis, erythema, and meningeal symptoms, epidemic myositis with, 283.
- Panhypopituitarism (anterior), Simmonds' disease or, its clinical diagnosis by the combined use of two objective tests, 297; tests used, 298.
- Pigment metabolism in refractory anaemia, 262.
- Plasma, protective power of, against saponin lysis in refractory anaemia, 269.
- Proceedings of the Association of Physicians of Great Britain and Ireland, 1941. Thirty-fifth Annual General Meeting, 331.
- Red cells, resistance of, of patients with refractory anaemia to saponin lysis, 268.
- Saponin lysis, protective power of plasma against, in refractory anaemia, 268. — lysis, resistance of red cells of patients with refractory anaemia to, 268.
- Schumm's haemochromogen test, 100.
- Sclerosis, and giant cell hyperplasia of the marrow, refractory anaemia with fibrosis, 218.
- Simmonds' disease or panhypopituitarism (anterior), its clinical diagnosis by the combined use of two objective tests, 297; tests used, 298.
- Sulphates, disturbances in excretion of, in refractory anaemia, 268.
- Thiochrome test for aneurin (vitamin B<sub>1</sub>) in urine, clinical value of, 31.
- Urine, aneurin (vitamin B<sub>1</sub>) in, clinical value of the thiochrome test for, 31.
- Vitamin B deficiency, clinical features of Wernicke's encephalopathy and their probable relationship to, 41.
- Vitamin B<sub>1</sub> (aneurin) in urine, clinical value of the thiochrome test for, 31.
- Wernicke's encephalopathy: clinical features and their probable relationship to vitamin B deficiency, 41; recovery from, 46.
